

Orange County Cities Energy Efficiency Best Practice

Date: November 7, 2012, Time: 10:30-1:00 p.m.

Orange County Cities Energy Efficiency Best Practices Workshop

The Orange County Cities Energy Efficiency Best Practices workshop will provide insightful information to Partners about energy efficiency, loading order, and a renewable energy generation "Solar Project" for their cities. The Partnership will leverage the Peer-to-Peer support initiatives to discuss the integration Demand Side Management (IDSM).

Participants

The workshop is designed for Local Government (LG) Public Works Directors, City Engineers, Operations Managers, Facilities Manager, Energy Engineers and related personnel.

The workshop will cover:

- Energy Efficiency opportunities for municipal facilities prior to renewable generation.
- Integrated Demand Side Management (IDSM). Loading Order.
- California Solar Incentives for Local Government.
- Renewable Generation Lessons Learned - City of Huntington Beach.

Guided tour of City of Huntington Beach's 2.1 MW Solar Project will take place

Lunch will be served

Key Speakers

- Aaron Klemm, C.E.M., LEED. AP, Energy Manager City of Hunting Beach
Topic: Managing a Renewable Generation (Solar) Project.
(Lessons Learned from City of Huntington Beach Project)
- Toia Gray, Account Executive, Southern California Edison,
Topic: Facilities Energy Efficiency Retrofits & IDSM loading order.
- Jeffery Lidskin, Manager, CSI Customer Communications, Southern California Edison
California Solar Incentives for Local Government.

Date: November 7, 2012, Time: 10:30-1:00 p.m.

Venue: Central Library 7111 Talbert Ave., Huntington Beach, CA
